

TIME TO PUT THE PIECES TOGETHER!

In partnership with the Rhode Island Department of Transportation, the University of Rhode Island Transportation Center has offered programs for high school and middle school students, introducing them to opportunities in the transportation and construction industries.

We would now like to make these students aware of employment and internship opportunities with municipal Public Works and Engineering departments. If you, or your HR department, would send me a list of entry level positions and internship opportunities as they become available, I would greatly appreciate it.

This year the Rhode Island Construction Career Days are being held on May 13th and 14th. The Engineering Career Day will be on May 12th, the Summer Transportation Institute, Business, Engineering and Construction Academies will be in July and August.

Please send your information to jcjci@cox.net or fax to the URI Transportation Center at (401) 874-2297. Should you have any questions, please do not hesitate to contact me at (401) 368-4850.

Thank you, in advance, for your participation!

Jeffrey Cathcart
Director of Technology Transfer & Outreach
URI Transportation Center
